DESCRIPTION

Spectre’s 8500 Series Submersible Pressure Transducers offer the first available submersible sensors that are manufactured, designed and calibrated to each customers specific operating conditions. Each transducer output is digitally mapped to correct for any non-linearity or inaccuracies in the sensor. This digital correction and the inherent advantages of the fused bond sensor provide the most accurate and flexible transducer in the industry.

FEATURES
- Proprietary Fused Bond Sensor
- Accuracy 0.05% BFSL
- RFI/EMI Protection
- Digital Temperature Correction at operating conditions
- Sensor Wetted Material Machined From Solid Stainless Steel Bar Stock (No Welds)
- Unparalleled Long Term Stability
